What happens in the city of bones

Strains and sprains to the musculoskeletal system (bones, joints and connective tissue) are not uncommon. But the damage caused by injury, overuse or disease can create pain and swelling and can limit your mobility or flexibility. When that happens, you may need specialized care to get your body moving again as it should. About orthopedic medicine Our orthopedic specialists can help you get back on your feet. Many of our surgeons are board-certified, and they have also received additional advanced fellowship training in their particular areas of focus. In addition, our team can draw on the vast resources of the entire hospital - specialized imaging studies, advanced anesthesia and the broad spectrum of consulting services - if needed in the diagnosis and treatment of your condition. Why choose us for orthopedic medicine Expert and personalized care. Our doctors and surgeons have more experience with complex injuries and conditions than other orthopedics programs in the region. The full continuum of care. Once you have been diagnosed by our doctors, you can expect to remain under their care and the care of other specialists throughout your entire treatment and rehabilitation. Convenient locations for office visits. The orthopedics department is located on the campus of The University of Kansas Hospital in Kansas City, Kansas, and has offices at KU MedWest in Shawnee and the Indian Creek Campus location in Overland Park. Fast access. Our goal is to see an athlete within the first 48 hours after an injury. The full range of care - from the first visit to diagnosis, treatment, rehabilitation and follow-up care. We offer a team of specialists in addition to the physician who sees you on your first visit. The highest level of care for all athletes. The same doctors who care for the Kansas City Royals and The Kansas City Chiefs will see your 8-year-old soccer player. A team of highly trained doctors, surgeons and staff equipped to deal with the special needs and focus of athletes. 6 convenient locations. The Sports Medicine and Performance Center has locations in Overland Park, Truman Sports Complex, Kansas City, Kansas, Shawnee and Lawrence, Kansas. U.S. News & World Report recognized our program as high performing in its 2021-22 Best Hospitals report. The honor places our care among the top 10% of orthopedics programs evaluated. We are proud to provide you and your loved ones with nationally recognized care. Read about this honor Orthopedic trauma care Our team of fellowship-trained and board-certified orthopedic surgeons is experienced in emergency care and highly skilled in treating traumatic fractures, dislocations and soft tissue injuries. We treat a full spectrum of cases, from simple injuries to complex surgery. We have access to the latest and most advanced diagnostic techniques and tools available. Through our multidisciplinary approach, we also work with physicians from other specialties within the health system, including general surgeons, trauma surgeons, plastic surgeons and rehabilitation and other medical specialists. Orthopedic trauma care at The University of Kansas Health System is available 24 hours a day, 365 days a year. Rehabilitation is enhanced by skilled and certified physical and occupational therapists on site in the same facility. Our goal is to get you back on your feet and in optimal condition in the least amount of time. Orthopedic medicine services Bones, muscles, ligaments and tendons are all connected in a way that helps our body move. The lack of movement or its restriction changes everything about how we function in our daily lives. Sometimes our movements are restricted because of normal wear and tear on our bodies. We sit, stand, walk or run every day, and the excessive movements that accumulate over the years often cause us to require a tune-up. At times, an injury or disorder has damaged one of these vital functions, and we need therapy or surgery to heal properly. We provide orthopedic services for: Doctors at The University of Kansas Health System are care providers and researchers at the forefront of new medical discoveries. From primary care to complex conditions, we offer hundreds of specialists. Thank you very much for your cooperation. 1. I was in HDSP for sometime due to a drug crime. I ran with the Paisa Car (Hispanic non gang related; cartel members ok) Upon entering while in the "fish tank" 30 days in your cell with a celly you see a Case worker who asks you if you want to hit GP (General Population) or Protective Custody. Here you can choose...if your stupid; molested a child and select GP the moment your stay in the fish tank is over you are moved to the Level 3 yard. Once in Level 3 your Celly will ask you your PSI (Pre Sentence Investigation report) this will have your crime and if you talked to the cops ect. This paperwork will be handed over to the "Key holder" the leader of the car. If your clean no issue if your paperwork is dirty for molesting a child etc. they will tell you it's ok we all make mistakes etc. In the background we are planning to take you out. For us it was either pay the Southsiders to clean our mess or we can keep it within the Paisa Car. HDSP is in the desert and the yard is covered in rocks. We would wait until Chow time. Dinner during winter ,Breakfast during Summer when we had cover of darkness walking to the chow hall we would have preplanted a special rock. Nearing said rock the line would lose its form and the selected person picks up said rock and slams it against the persons head as hard as possible. Normally person would drop, bleed and we continue as nothing happened, throwing away used rock. If he person would not drop back 1 and 2 would either start beating up the person. (Really depends on how bad they fucked up) If it was a true fuck up a shank would be used. (In 2 years only saw this happen 2 times none by the Paisas but by the Southsiders) 2. Usually child molester, sex offenders, child pornographers will have fake paperwork stating that their crimes were different. Each race is supposed to handle their own in this regard. Meaning, if the whites found out that some new black guy was a rapist, we couldn't hit him for it, the blacks had to. We had guards that would let us know when a sex offender hit the yard, they hated them as much as we did. My best friend on the streets was raped by her dad from the age of 8, so I had a bitter heart for those motherfuckers in prison. Whenever a white SO hit the yard I was on, it was known that I had first dibs on getting him. I probably stabbed at least 8 child molesters in my bid. And I'd do it again. 3. Spent 10 months in the Texas prison system for manslaughter. FYI, first offence and it was an accident which is why it was a short sentence. They were typically berated and yelled at pretty badly. Most of them that stuck around the gen pop dorms were honest and just pervs. She was 16 he was 22. That kind of shit. We had one guy, raped both his daughters from 4 on up. Finally his then 14 y/o hid her cellphone and recorded it happening to her younger sister. SPOILER this is graphic. One night I woke up to pee and my neighbor (bed at my feet, we were in rows) pulled me back down. Told me not to go to the bathroom. I'm new to this and don't know any better and brushed it off. Anyways three guys had the chester pinned down raping him. At this point all I really saw well was blood or shit and then his face. It looked like a sock wrapped around a broom stick shoved sideways in his mouth to keep him quiet. The scary part was the sound. There were 56 men in this dorm. There wasn't enough sound to wake up hardly anyone. All this lasted maybe one second and I went back to bed. I didn't sleep that night or the next at all. That man spent the rest of the time I had there with his head down or swinging wildly at anyone who even looked at him wrong. The worst part is most everyone acted like it was normal and I didn't do a damn thing about it. I went with the flow. I lived in the same large (gymnasium sized) room for 5 months with him and could never look at him knowing I didn't help. Prison is hell. People act like it's "what they deserve". If our governments elects spent one week in a prison we would see reform so fast. I only made it because I was smart. A few well respected people basically said this guys not coming back don't fuck with him and I would built a tattoo gun or radio. Steal from work (guards never looked twice at me) I still got stabbed, got beaten and had to hurt a few people. 4. They check in to PC or they get the business. Most chesters I encountered in jails and prisons were older, white guys. There were a few there for sexual relations with girls who were -15 when they were 18 and they are generally left alone as it is a situation many people might find themselves in as an 18 year old kid. Older dudes do not get that leeway though. They are beaten, extorted, robbed, raped themselves, or killed by the alpha inmates. They really didn't like to kill the guys at the camp I was on as they are, like I said, older white guys. They typically have money on their books and go to commissary every week. They are an endless source of hygiene products and snacks. I've seen a line of inmates outside of a chesters cell door with a list of items they each want him to order. For his sake, he better hope he's got the money on his books to satisfy all their wants. If he doesnt, it never ended well for him. At a county jail I was in in Northern VA -1997 they would bring food carts up to each block with the appropriate number of trays/drinks for each inmate to receive one meal. It wasn't exclusive to chesters but if you saw a guy grab two trays back to back through the food slot you knew someone either A) wasn't going to eat because of their crime or B) they were put "on a diet" because whoever grabbed two trays thought that person was a bitch. Normally though, they would announce to the rest of the block who's tray they were taking to alleviate any potential confusion in case one of their boys was the guy going without. Funny part is, most people didn't even eat the food. They waited until everyone had access to their boxes (we were locked out of our cells in the dayroom every morning at 07:30) and made "burritos"(ramen, chips, meat, cheese etc.) for dinner. COs know what's going on, they don't really seem to care though. I guess overall they get it the worst. A lot of guys are there to do their time and go home or do their time as drama free as possible. All bets are off though when it comes to chesters. 5. I was just in a high security felony wing of jail waiting for extradition to another state, not in prison at the time. Well the few that came in were told to go to seg or get their fucking heads busted everyday till they did. The one dude came in and refused to leave was yelled at, spit on, and threatened until everyone had enough. 3 dudes ran up in his cell and threw him the most vicious beating you can imagine. I remember him crawling out of his cell and the dude pulling him back in for more. I could hear the bones breaking from 20ft away. He died on the way to the hospital. All the guys that took part were there on murder beefs anyway so the extra 5 years they got was worth it to them. This was an extreme case as the jail was over populated and they tried to sneak the chomos in gen pop because seg was full. Everywhere else I was incarcerated they keep the touchers far away from us. 6. I did 6 months in CFCF, didn't even make it to gen pop before 2 big ass mother fuckers from the same street found out that some Asian dude was in for touching his niece. This guy, my god, they approached him at lunch and snatched away his tray first. The bigger of the 2 slapped him so fucking hard it almost hurt me while screaming "so you like to hurt little girls?!" Followed up by the man who took the tray hitting this little Asian guy with a straight up sucker punch that laid him out flat. After that I'm pretty sure every inmate on C block stomped his head. COs had pepper spray flying everywhere and when all was said and done the pedo was taken to the hospital and the rest of us didn't get dinner because we were locked down for 24 hours. That was only quarantine. The whole thing could have been avoided if there wasn't a giant white board with everyone's name, inmate number, and charges written all over it. 7. My accounts may be anecdotal at best. This is from one specific maximum security federal prison. There are so many different types of jails and prisons with varying levels of security and huge variables in population type. Obviously what I experienced doesn't mean that every single other jail and prison is like this. When you first get there, your counselor will ask you if there's any reason that you can't "walk the yard" or be in general population. This is usually where you make the decision to do your time in the SHU all alone, or take your chances out with everyone else. You do need to have a good reason though (child molester, gang issues, there's a hit on you from the last place you stayed, you're a snitch etc..) When you get settled in, the shot caller from your race will approach you. You're told something like this "You have one week to get us your paperwork so we can make sure you're not a chomo or have no rule 35's. If you don't provide this in a week, we'll kill you. Here's a toothbrush, some snacks, some soap, let me know if you need anything." Chomo = child molestor. Rule 35 = reduced sentence for snitching on someone. So, you show them your paperwork, and if you're clean you're good to go. If you don't show paperwork, or you're not clean, you will be killed within the next week. For some reason, new guys do not take this seriously. They either don't produce their paperwork, or they actually produce it knowing that there's less than desirable stuff on there. What happens to them? Stabbed 27 times all in a matter of seconds. Face/head stomped on so hard until it just cracks open and gunk leaks out. Mouth/jaw shattered with a pool stick or pool ball. Two guys killed in about 60 seconds by a tiny Mexican holding just a bocce ball. Native Americans pretend like it's all good, 10 of them go into the sweat lodge for religious reasons, only 9 come out. 10th guy had a clean gash in his head from a shovel. Cell mate hung the guy with a bed sheet to make it look like suicide. Why do these guys take chances with trying to be in general population? Because the SHU sucks. You're by yourself, no TV, 3 showers a week, no access to things like the prison barber, limited access to phones, video visitations, constant video monitoring to prevent suicide, and every 18 months they ship you to a new prison. If you're looking at 40 years for child rape, that can be a LONG time to live in those conditions. Sometimes guys will stay in general population knowing that they will get killed simply because they don't want to be there but can't commit suicide in the SHU.
